

The 5-Step Test

1. Does the child sit all the way back against the auto seat?
2. Do the child's knees bend comfortably at the edge of the auto seat?
3. Does the belt cross the shoulder between the neck and arm?
4. Is the lap belt as low as possible, touching the thighs?
5. Can the child stay seated like this for the whole trip?

If you answered “no” to any of these questions, your child needs a booster seat to make both the shoulder belt and lap belt fit right for the best crash protection. Source: SafetyBeltSafe USA

Strap should cross between neck and arm

Must sit all the way back

Lap belt should be as low as possible
