---	---	----------------------------	---	--------------------------------------

*\* **Traditional belt-positioning booster seats are never to be used with lap-only seat belts** (unless explicitly allowed by the booster seat manufacturer; at the most recent revision date of this document there are none that allow it). **Booster seats are designed to be used with a lap-and-shoulder seat belt.** In vehicles where there are lap-only seat belts available, this list provides options for those families to purchase a child restraint that will be compatible with the lap-only seat belt (which is used to install the car seat) while providing protection for their children AND be in accordance with Colorado Law. Colorado Law dictates that children must be restrained in a car seat or booster seat until the age of 8.*

*This list is provided for reference only and should not be interpreted as an endorsement of any product. If there is a restraint you feel should be added to this list, please email [carseats@childrenscolorado.org](mailto:carseats@childrenscolorado.org).*

*Information provided in this document was obtained from manufacturer instructions and websites.*
